## ***Made-To-Order Slit Rolls***

### **SPECIFICATIONS**

<b>Roll Widths</b>	Up to 44". Order to the nearest 1/32". Slit width tolerance: Plus or minus 1/32".
<b>Roll Striping</b>	Stripes run continuously the length of roll. Number of stripes limited only by width of roll. Minimum width of stripes: 1/8".
<b>Roll Length</b>	All orders should specify desired and/or maximum length acceptable.
<b>Roll Diameter</b>	40" Maximum. All orders should specify maximum diameter acceptable.
<b>Packaging</b>	Top opening corrugated carton for smaller orders. Skids or pallets used for larger orders. Skids and pallets are packaged in clear stretch wrap.
<b>Units</b>	One unit equals 1" x 1000 feet long or 12,000 square inches. Width of carbon is figured exactly to compute the number units.

## ***Made-To-Order Slit Rolls***

### **SPECIAL CHARGES**

<b>Make-Ready Charges</b>	\$160.00 for each item under 2,000 units.
<b>Perforating Charge</b>	\$.07 per unit per line. Minimum charge of \$100.00 per line.
<b>Internal Striping</b>	\$110.00 for each internal stripe per item.
<b>Face Out Winding</b>	\$.09 per unit. Minimum \$100.00.
<b>24-Hour Rush Charge</b>	\$195.00
<b>48-Hour Rush Charge</b>	\$145.00

# *Spot Carbon*

## **SPECIFICATIONS**

<b>Roll Width</b>	3" to 21". Order to nearest 1/32". The roll width is undercut 1/32" on marginally punched side only. Minimum width for billing purposes is 10".
<b>Roll Diameter</b>	24" Maximum
<b>Carbon Coating and Striping</b>	<p>Any combination of carbonized or uncarbonized area is possible within these limitations:</p> <ol style="list-style-type: none"><li>1. All patterns must provide a total of at least 1/16" uncarbonized area at some position across the web at every cross perforation or cut-off position. If not specified, 1/32" will be taken at top and bottom.</li><li>2. Limitation on coating accuracy: 1/16" variation on each of four sides of any coated area.</li><li>3. Uncarbonized stripes may run continuously the length of the roll.</li><li>4. Minimum width of stripe is 1/8", plus or minus 1/32".</li><li>5. Patterns requiring extensive plate cutting (as defined by Stenno Carbon Company) may be charged an extra \$60.00, \$110.00 or \$160.00. You will be notified prior to manufacturing if extra charges apply.</li></ol>
<b>Roll Winding</b>	Face in and face out.
<b>Available Spot Cylinder Sizes</b>	28", 24", 22", 20", 17" and 14".
<b>Marginal Punching</b>	3/16" diameter holes placed 1/2" vertically center-to-center. When there are double line holes, the horizontal distance between rows of holes is 1/2" center-to-center.
<b>Tabs</b>	<p>Two styles are available:</p> <ol style="list-style-type: none"><li>1. Center Tab: Uses semi-circular tab with 1/16" tie at top of semi-circle.</li><li>2. Corner Cut: Provides a triangular extraction feature at edge of form. Corner cut stops 1/16" short of marginal punching.</li></ol>

## ***Spot Carbon***

### **SPECIAL CHARGES**

<b>Make-Ready Charge</b>	\$185.00 Make Ready Plate Charge per item. \$305.00 Make Ready Plate Charge for Red AC \$105.00 Red AC Wash-up Charge

# Spot Carbons

## STANDARD STYLE NUMBERS

(Specify number instead of sketching a diagram. You are viewing the uncoated side.)

<p>CENTER TONGUE ABOVE PERFORATION</p> <p>Diagrams 10-17: Center tongue above perforation. Each diagram shows a rectangular carbon with a center tongue pointing upwards. The perforations are located below the tongue. The numbers 10 through 17 are arranged in two rows of four.</p>	<p>CORNER TONGUE</p> <p>Diagrams 30-37: Corner tongue. Each diagram shows a rectangular carbon with a tongue pointing from a corner. The perforations are located along the edges. The numbers 30 through 37 are arranged in two rows of four.</p>
<p>CENTER TONGUE BELOW PERFORATION</p> <p>Diagrams 20-27: Center tongue below perforation. Each diagram shows a rectangular carbon with a center tongue pointing downwards. The perforations are located above the tongue. The numbers 20 through 27 are arranged in two rows of four.</p>	<p>NO TONGUE</p> <p>Diagrams 40-48: No tongue. Each diagram shows a rectangular carbon with perforations along the edges and no tongue. The numbers 40 through 48 are arranged in two rows of four.</p>
<p>CORNER TONGUE WHICH TERMINATES AT MARGINAL PERFORATION</p> <p>Diagrams 50-61: Corner tongue which terminates at marginal perforation. Each diagram shows a rectangular carbon with a corner tongue pointing from a corner. The perforations are located along the edges, and the tongue terminates at a perforation. The numbers 50 through 61 are arranged in three rows of four.</p>	<p>NO TONGUE - NO CROSS PERFORATIONS</p> <p>Diagrams 80-87: No tongue - no cross perforations. Each diagram shows a rectangular carbon with perforations along the edges and no tongue. The numbers 80 through 87 are arranged in two rows of four.</p>
<p>CORNER TONGUE WHICH TERMINATES AT MARGINAL PUNCH AND IS CUT THROUGH BY MARGINAL PERFORATION</p> <p>Diagrams 70-77: Corner tongue which terminates at marginal punch and is cut through by marginal perforation. Each diagram shows a rectangular carbon with a corner tongue pointing from a corner. The perforations are located along the edges, and the tongue is cut through by a perforation. The numbers 70 through 77 are arranged in two rows of four.</p>	<p>DOUBLE ROW HOLE PUNCHING</p> <p>Diagrams 90-94: Double row hole punching. Each diagram shows a rectangular carbon with two rows of perforations along the edges and no tongue. The numbers 90 through 94 are arranged in two rows of four.</p>

## **SHEETS**

***Carbonized Bond*** is also available in sheets.

- Cutting Charge**      \$5.00 per 1000 sheets; \$80.00 minimum per item.

## ***Flat Sheets (One-Time Carbon)***

### **GENERAL INFORMATION**

#### **Sheet Striping**

- Stripes run continuously the length of the sheet. Number of stripes limited only by the width of the sheet.
- Minimum width of stripes – 1/4"
- Manufacturing tolerance of striping is plus or minus 1/32"

#### **Packaging**

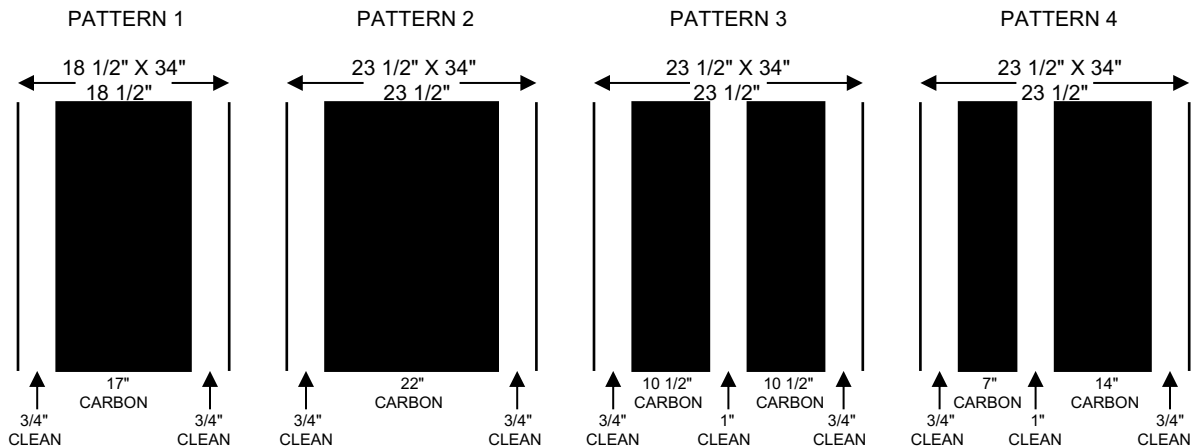

- Standard Package – 1000 sheets (2 reams)
- Chip board dividers on top, bottom and between sheets 500 and 501.
- Contents label on one end.

#### **Curl**

Curl in flat sheets is due cause for rejection of carbon if the curl exceeds plus or minus 10% from horizontal at 50% relative humidity and 78°F, providing there are no other contributing factors such as carbon becoming wet in transit, excessive temperature and/or humidity in storage in forms manufacturers' plants or unsuitable storage practices such as placing cartons on edge or improperly stacking packages. Measurement of curl is determined by laying sheets of carbon on a flat surface and visually determining amount of lift of the edges.
